PROJECTS

Weather Application | *HTML, CSS, Javascript*

- Developed a responsive weather application using HTML, CSS, and JavaScript, integrating with the OpenWeather API to fetch real-time weather data based on user input.
- Implemented dynamic UI updates that display current weather conditions, including temperature, humidity, and wind speed, for any location worldwide.
- Deployed the application on GitHub Pages, ensuring it is accessible to users through a live link at tanikshmahajan.github.io/WeatherApp.
- Enhanced user experience with clean design and intuitive search functionality, enabling seamless navigation and efficient access to weather information.

Banking Application REST API | *Java, Spring Boot, Hibernate, Maven, MySQL*

- Developed and implemented a robust Banking Application REST API using Spring Boot, enabling seamless CRUD operations for account management and transaction functionalities.
- Leveraged a stack comprising Spring Data JPA, Hibernate, MySQL, and Java to create a scalable and efficient backend system, facilitating secure account creation, deposits, withdrawals, and detailed account information retrieval through RESTful API endpoints.

Tic-Tac-Toe | *Java, JavaFX*

- Developed a Tic-Tac-Toe game with the help of JavaFX library
- Implemented a real-time status which displays whose turn it is
